# Oxygen Revolution®

*Oxygen Revolution* is a brand of Munus International Srl cosmetics division. Our products are the result of years of research and experimentation thanks above all to the synergies created with aesthetic medicine studies, dermatologists, biologists and engineers as well as important Italian universities such as:

A.D. 1308  
**unipg**  
UNIVERSITÀ DEGLI STUDI  
DI PERUGIA

Department of Microbiology and Clinical Microbiology of the University of Perugia

**UNIVERSITÀ  
DI PISA**

University of Pisa

School of Pharmaceutical Sciences and Health Products of the University of Camerino

**Università  
di Genova**

University of Genoa

It is thanks to continuous research that, in addition to obtaining patents, effective, safe and unparalleled formulas have been developed on the current national and international scene in terms of effects and results. Our philosophy is to stand by our customers and their needs by continuing to improve existing products and creating new ones for their needs. This also happens thanks to the continuous investments by Munus International Srl in Research & Development with a particular focus on financing university research doctorates in order to favor and stimulate the unique discoveries resulting from the commitment and dedication of young and brilliant Italian researchers. We will continue to walk this wonderful path literally fascinated and guided by the words of the Nobel Prize for Medicine Alexis Carrel:

***“ Give cells what they require in nutrition and the pulsation of life could go on forever. ”***

# OZONE OXYGEN

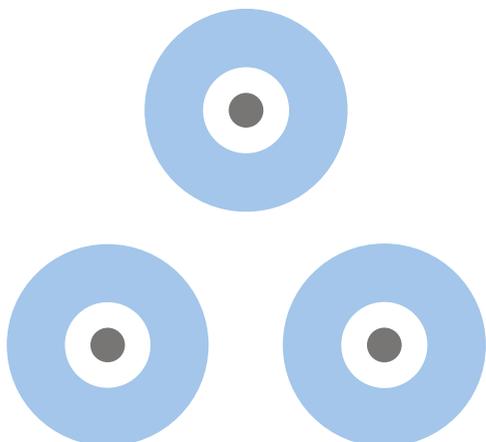

The basic active ingredient that makes our cosmetics revolutionary is obtained from OZONE, O<sub>3</sub>.

Ozone therapy is currently a globally recognized science but treatments are rather invasive and involve injecting the ozone gas directly into the tissues that, as it breaks down, activates the beneficial properties for cells.

Our products durably contain ozone active principles thanks to a patented and exclusive production system.

Having synthesized the active and beneficial properties of ozone permanently inside Oxygen Revolution creams, serums and gels makes it possible to enjoy the benefits of ozone therapy in a simple and non-invasive way. The ozone derivatives are absorbed by tissues, accelerate and strengthen cell metabolism by amplifying the action of the other active ingredients, act as a booster and natural carrier taking with themselves the other healthy substances to the various layers of the epithelium.

Scientific research has also proven that our basic active ingredient has important ANTIBACTERIAL (also on multi-antibiotic-resistant strains), ANTIFUNGAL, ANTI-INFLAMMATORY and REGENERATING functions.

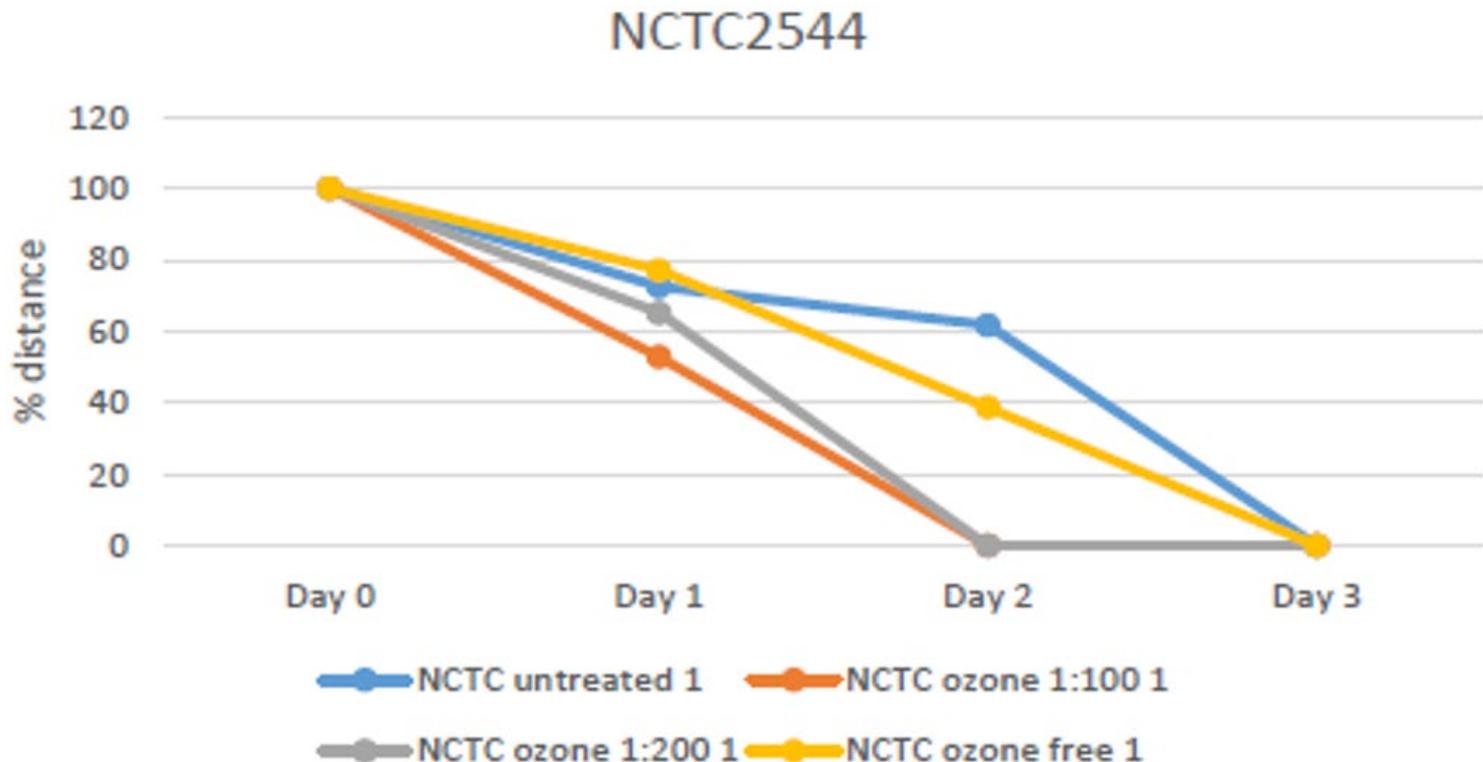

# REGENERATING

On this page we report an example of a scientific result relating to the regenerating function of our active ingredient ozone-oxygen.

Below is an extract from the in vitro experimentation of the University of Perugia. Human keratinocytes (NCTC2544) were grown to obtain a cell which was then scratched. The ozone-oxygen gel showed evident regenerative activity even when diluted 1:100 and 1:200, in fact the cell layer was completely regenerated in 48h compared to the 72h required without the treatment with the ozone-oxygen gel.

This example may be significant as keratinocytes are the most abundant cell type in the epidermis and are present in all its layers. They mainly have a protective function against attacks by pathogenic organisms, heat, UV radiation and water leakage.

***Diagram of regenerative activity of the ozone-oxygen gel on NCTC2544 keratinocytes***

# INNOVATIVE

## Cosmetics and medicine never so close

Ozone-derived active oxygen and stabilized within our products is capable of increasing the life of cells. Physiologically, skin cells receive the oxygen they need from the bloodstream to start their normal functioning mechanisms. This natural process results in oxygenation of the skin according to the physiological conditions of the individual such as age, disease, lifestyle. The cell receives external help through the active oxygen atoms contained in our products; the atoms - spreading by ionic swarm and crossing the five layers of the skin - reach the dermis and are immediately absorbed by the cell, representing real energy for cellular metabolism.

This gives a powerful contribution to the cell's vitality, hydration and the ability to be more energized when replicating itself and, therefore, to do so better.

# UNIQUE

## Helping a natural process

Ozone by-products are absorbed by the cell and immediately used by increasing the cellular activity of the mitochondria. This results in the cell's uptake of water and its substances such as vitamins, acids and other nutrients.

Our products, containing Oxygen-Ozone, enable physiological absorption of all nutrients without the need for chemical carriers which, in some cases, are stressful for the cell itself.

The result is a hydrated and active cell, resulting in a younger and more toned skin.

The entire *Oxygen Revolution* line is paraben-free and fragrance-free. All our products boast a reduced list of ingredients compared to commercially available products, including fewer preservatives and antibacterial substances due to the powerful antibacterial function of the active oxygen atoms.

# EFFECTIVE

## Oxygen atoms to be used by cells 100%

The *Oxygen Revolution* line of products helps the skin to renew itself from the inside with a marked increase of cellular activity and an effective action on the effects of aging damage by counteracting them in depth and restoring cellular metabolic balance.

The cell is able not only to react physiologically to external and internal aggressions, but also to naturally absorb the other substances contained in the single products of our line, which, depending on the combination of ozone by-products content and other active principles, become specific for various treatments.

In summary we find:

- Improvement of tissue oxygenation;
- Improvement of turgor and elasticity of the skin thanks to the stimulation of fibroblasts;
- Skin rejuvenation.

# CONVEYOR

## Synergistic effect ozone/oxygen and other active ingredients

The action of the other active ingredients contained in our products is made effective thanks to the fact that the ozone-oxygen acts as a carrier by transporting the various substances inside the skin, created to be instead a real barrier of our body.

The images below can be a simple example of how our product actually penetrates the skin versus others that remain on the surface. This small empirical experiment was conducted with Gel Ultra Soothing which is the product with the highest concentration of active oxygen and where the penetrating effect is most visible.

***Gel Ultra Soothing: the ozone-oxygen contained in all cosmetics allows penetration into the skin carrying also the other compounds.***

# OXYGEN REVOLUTION

**OZONE  
OXYGEN** + **OTHER ACTIVE  
PRINCIPLES**

The revolutionary, unique active ingredient at the base of our cosmetics, the ozone-oxygen gel, has multiple beneficial functions confirmed by scientific research: revitalizing, regenerating, antibacterial, antifungal and anti-inflammatory. Its additional carrier function generates a synergistic effect with the other active ingredients already known in cosmetics which, transported within the tissues, thus become truly effective for the treatment of our skin.

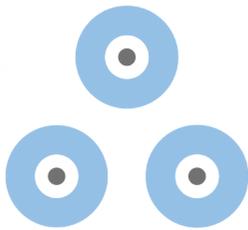

HYALURONIC ACID

VITAMIN E

OZONE OXYGEN

COLLAGEN

VITAMIN A

JOJOBA OIL

VITAMIN C

# OTHER ACTIVE PRINCIPLES

## VITAMIN A

Vitamin A is a fat-soluble substance acting on the skin and is able to stimulate some specific enzymes that improve skin thickness. It regulates tissue growth, improves skin brightness, helps reducing wrinkles.

## ARGAN OIL

Argan Oil - rich in Vitamin E, phenolic compounds and natural antioxidants - is a precious and essential oil for maintaining cellular youth. It has an important anti-aging repairing action and stimulates tissue regeneration and oxygenation, giving the skin elasticity and tone.

## VITAMIN C

Vitamin C or ascorbic acid is one of the most potent antioxidants found in nature. It prevents damage caused by free radicals and stimulates collagen biosynthesis by slowing down the cellular aging process. Effective in the treatment and prevention of skin aging and photoaging.

## JOJOBA OIL

Jojoba Oil is an unbeatable ally for perfect skin. Rich in vitamins and natural antioxidants, it acts as a filter against pollution and naturally slows down skin aging. Its ability to balance oils and strengthen the hydrolipidic film protecting the epidermis makes it a natural antibacterial capable of reducing skin inflammation.

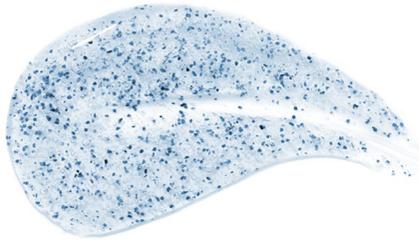

## VITAMIN E

Vitamin E is a natural antioxidant that neutralizes the reactivity of free radicals by blocking the reactions that determine oxidative stress. It strengthens the skin barrier, prevents irritation, stimulates natural cell renewal, protects against the appearance of the early wrinkles keeping the skin elastic, toned and hydrated.

## COLLAGEN

Collagen is a resistant and elastic protein that is widely distributed in the dermis (the deepest layer of the skin) to provide support. Collagen gives the skin elasticity, keeping it firm and compact. The reason for this is that it is found in the extracellular matrix of the dermis, which is an intricate network of molecules responsible for the "physical" structure of the skin itself. Thus, collagen cements the cells of the skin tissues and also contributes to their constant renewal.

## SALICYLIC ACID

Salicylic acid is used in cosmetic and dermatological products thanks to its exfoliating, soothing, smoothing, bacteriostatic, healing and antiseptic properties. Useful for fighting skin imperfections, particularly suitable for reducing the appearance of acne and pimples.

## VIRGINIAN AMAMELIDE

Since ancient times, witch hazel (*Hamamelis virginiana*) has been used by Native Americans to treat a variety of conditions including insect bites, muscle aches, cuts, rashes, sunburn, hemorrhoids and bruises. Witch hazel inhibits enzymes that degrade elastin and collagen (elastase and collagenase); this effect helps to keep the skin firm and flexible and also promotes wound healing.

## HORSE CHESTNUT

With its vasoconstrictive and decongestant action, it is useful for the health of veins and its action is expressed in the improvement of the microcirculation by reducing capillary permeability, thus promoting lymphatic drainage.

## SEA OAK

It is used in cosmetics mainly for its slimming properties and is widely used in anti-cellulite or slimming products because it acts on localized adiposity. This alga is rich in iodine which, together with the other substances contained in brown algae, once absorbed into the skin promote microcirculation and stimulate the metabolism of the basal lamina, eliminating toxins with an immediate effect on skin tone and hydration.

## IVY

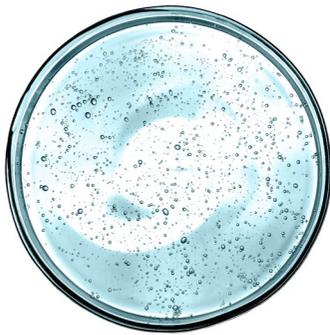

Ivy (*Hedera helix*) boasts precious cosmetic and healing properties. Thanks to its active ingredients, it is one of the most useful plants for combatting skin imperfections such as cellulite and oily skin. Ivy extract, rich in saponins, has a strong cosmetic toning action on all body parts that tend to relax and lose tone.

## KERATIN

Keratin is a fibrous protein made up of long chains of amino acids, mineral salts and vitamins. It is the protein present on our stratum corneum, the most superficial layer of our skin and is the main element of hair and nails. It creates a barrier against mechanical stress and against microorganisms and bacteria thanks to a weakly acidic pH. It also represents a barrier against UV rays protecting the skin also from thermal changes.

# OTHER ACTIVE PRINCIPLES

## HYALURONIC ACID

Hyaluronic acid is the molecule of youth, it stimulates the formation of collagen and connective tissue, ensures optimal skin hydration, gives the skin tone, softness, elasticity and resistance.

By retaining and absorbing moisture, hyaluronic acid works on two skin levels: in depth it returns volume to the skin making it plumper and more filled while the skin's surface layer is softer and more elastic. The result is a skin with a healthier, younger and more compact appearance. It also stimulates the fibroblasts to increase the production of collagen which, together with elastin, is one of the fundamental proteins for the skin structure.

## GOTU KOLA

Several active ingredients are extracted from centella leaves that are beneficial to the body: they contain flavonoids, phytosterols, mineral salts and tannins but it is mainly the triterpenic acids (madecassic acid, Asian acid) and the triterpene saponins that are used for curative purposes. Several properties are attributed to them, which make gotu kola a medicinal plant with thousand uses. It stimulates venous circulation by improving the elasticity of veins and the reabsorption of interstitial liquids thanks to its phlebotonic and anti-edema properties, improves blood vessel tone making veins less fragile thanks to its vasoactive properties and stimulates collagen production by promoting tissue healing.

## HYDROLYZED PLACENTA

Placental extracts contain amino acids and glycosaminoglycans that are precursors of the basic substance of the dermis and proteins, and have proved to be useful in the re-epithelialization processes by activating cell synthesis.

The active components penetrate well through all layers of the skin and mucous membranes, nourish the tissue, accelerate metabolic processes and, in the presence of inflammation, offer rapid resolution by accelerating blood flow. Toxins do not accumulate in cells but are quickly removed from them. It boosts local immunity. The placenta hydrolyzate accelerates energy processes in the tissues and the damaged surface is restored more quickly due to the accelerated production of collagen and elastin. It rejuvenates the body's cells and prolongs their life cycle.

## ALOE VERA

Aloe has soothing properties; the vitamins and minerals (in particular manganese, copper and selenium) contained in aloe juice are powerful antioxidants. They counteract the cellular aging process and fight the damages caused by free radicals. Thanks to the synergy between antioxidant and moisturizing substances contained in the plant, the aloe vera gel stimulates the production of collagen and elastin, two substances essential for reducing the appearance of wrinkles and maintaining a young and healthy appearance. Thanks to its antibacterial, anti-inflammatory and healing action, aloe gel is an ally against pimples and acne.

## FLAX SEEDS OIL

Flax seeds offer a number of benefits and properties. They are notoriously rich in plant extracts of Omega 3, fatty acids that perform various functions, in particular moisturizing and restoring elasticity to hair, strengthening it, acting on the shaft and thus preventing breakage. They are characterized by a good content of Vitamin E which is also useful for retarding the growth of white hair. In addition, flax seeds are able to balance the PH, a characteristic also acting for hair growth; by regulating the production of sebum, they are able to soothe the inflamed scalp by treating eczema and are also excellent for treating dandruff. Inestimable source of essential fatty acids or Omega 3, they allow to nourish hair and hair follicle.

## CHAMOMILE

The natural chamomile extract has exceptional dermatological properties thanks to its emollient, soothing and antimicrobial action. In addition to being used to treat inflammation and irritation of the skin, its protective properties against the harmful effects of solar radiation and its effective antioxidant effects are well-known. In particular, the flavonoids of chamomile are not limited to acting at the level of skin surface but penetrate deeply working in synergy with the chamazulene present in the phytocomplex of the plant: the combined activity stimulates the microcirculation of the skin and the activity of the fibroblasts, naturally favoring the synthesis of hyaluronic acid, collagen and elastic fibers present in our dermis.

# FORMULATIONS

## GEL ULTRA

### Pharmacy

*Gel Ultra* are characterized by the highest concentration of active ozone-derived oxygen.

It acts deeply in the tissues, accelerating metabolism and cellular vigor, combined with an important antifungal and bactericidal capacity.

## GEL EXTRA

### Pharmacy

*Gel Extra* are characterized by their high concentration of active ozone-derived oxygen atoms in the product.

Thanks to the synergistic effect with additional active ingredients, *Gel Extra* products become specific adjuvants and soothing agents.

## CREAMS

### Beauty

Within their composition they have a lower concentration of active oxygen than gels. They are suitable for continuous treatments and their effect is more visually perceived on the skin in a shorter time than those of gels, suitable for specific treatments, which act deeper and whose effects are perceived over a longer period of time. Inside creams the transmissive activity of Oxygen-Ozone prevails being a true natural carrier of other active principles.

## SERUMS

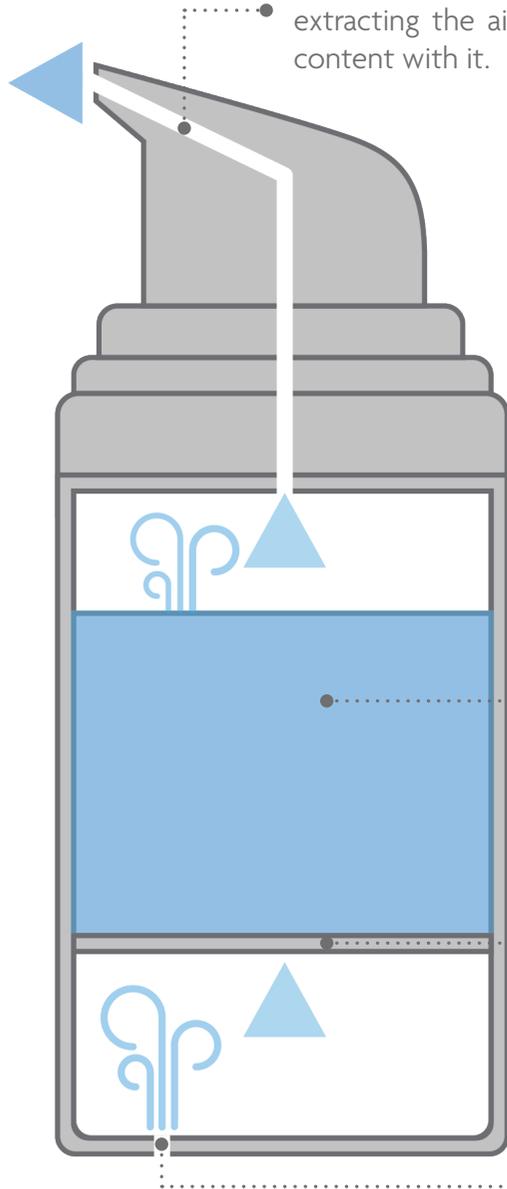

### Beauty

The oxygen atom content is halfway between gels and creams and the functions enhancement of hyaluronic acid and other active principles is remarkable.

# AIRLESS TECHNOLOGY

## AIRLESS PUMP

It creates a hollow effect; by extracting the air it takes the content with it.

All products of the Oxygen Revolution line are packaged in bottles with airless technology. This system consists of a mechanical pump and a container sealed by a piston that allows the product to be extracted through an air vacuum system.

The advantages of this packaging are:

- The cosmetic is never touched with fingers and, therefore, there is no contamination of the content during use
- The content never comes into contact with air and, therefore, is optimally preserved
- The dispenser is very precise and allows the necessary quantity to be extracted according to need
- Thanks to an internal membrane that pushes the product upwards, 100% of the product can be used without residues and waste.

## COMPOUND

The compound is pulled by an airless pump and pushed upwards by the underlying plate.

## PLATE

It is placed underneath and helps the compound to rise upwards thanks to the action of vacuum effect not to have product waste.

## HOLE

The little hole on the bottle base allows the air pressure to push the plate for a better compound outflow.

Revolution®**

# CREAMS

**OXYGEN REVOLUTION**

COSMETICS AND MEDICINE NEVER SO CLOSE

# DAY CREAM

Size 1.7 fl oz-50 ml

**Product category:**  
cosmetic, face cream

**Aroma:**  
fragrance-free

**Color:**  
white

**PH:** 5.5 – 6.0

**Best before:** 30 months

**PAO (Period After Opening):**  
6 months

**Packaging:**  
airless bottle

**WARNING:** For external use only. Avoid direct contact with eyes. Rinse thoroughly with water if the product comes into contact with mucous membranes. Keep out of the reach of children. Store in a cool and dry place, away from heat sources. Consult a doctor if swallowed or in case of adverse reactions.

**INGREDIENTS:** AQUA, ETHYLHEXYL PALMITATE, CETEARYL ALCOHOL, OZONIZED GLYCERIN, BEHENETH-25, HENOXYETHANOL, SIMMONDSIA CHINENSIS SEED OIL, IMIDAZOLIDINYL UREA, BEHENETH-10, DICAPRYLYL ETHER, LAURYL ALCOHOL, HYDROLYZED COLLAGEN, POTASSIUM SORBATE, LECITHIN, PENTYLENE GLYCOL, LACTIC ACID, GLYCERIN, HYALURONIC ACID, TOCOPHERYL ACETATE, CITRIC ACID, RETINYL PALMITATE, XANTHAN GUM.

Size 0.5 fl oz-15 ml

## DAY CREAM

The active oxygen base defends the skin from oxidative stress and carries the other active principles inside the skin. Specially designed for daytime use, when the skin needs to be hydrated, nourished and regenerated from UV damage. Its quick-absorbing and non-greasy formula is light, making the product perfect as a make-up base. Suitable for all skin types.

## HOW TO USE

Apply the product to the face and massage until completely absorbed. Use in the morning after proper cleansing. Use as a make-up base after proper cleansing.

## ACTIVE PRINCIPLES

Active oxygen  
Hyaluronic acid  
Collagen  
Jojoba oil  
Vitamin E  
Vitamin C

## OVERNIGHT CREAM

A nourishing and moisturizing face cream that acts during the night-time repair phase. During rest, the skin “wakes up” setting in motion its natural repair mechanisms and needs nutrients. The antioxidant and carrier properties of Oxygen-Ozone, in synergy with vitamins and the other active principles, counteract the damage of oxidative stress, improving the overall appearance of the skin. This formulation helps reduce dark skin spots making the skin uniform and radiant. Suitable for all skin types

## HOW TO USE

Apply the product to the face and massage until completely absorbed. Use in the evening, after proper cleansing.

## ANTI-AGING CREAM

The appearance of the signs of aging is caused by the alteration in the dermis structure (intermediate skin layer) where collagen, elastic fibers and glycosaminoglycans (e.g. hyaluronic acid) - the elements responsible for tone, elasticity and turgidity of the skin - are synthesized. The active oxygen action, in synergy with the other active ingredients, manages to penetrate the deep layers of the skin, reactivating the vitality of the cells and stimulating the production of new collagen and elastic fibres. It effectively counteracts the signs of ageing and skin slackening thanks to its elasticizing and restorative properties that make the skin even and toned. Its formulation is also suitable for sensitive and dehydrated skin.

## HOW TO USE

Apply the product to the face and massage until completely absorbed. Use in the morning and evening after proper cleansing. Also suitable as a make-up base after cleansing.

## ACTIVE PRINCIPLES

Active oxygen  
Vitamin E  
Argan oil

## GEL EXTRA LIPS

The combination of active oxygen derived from ozone, Jojoba oil, Aloe Vera and Virginia represents an ideal treatment for lips; it replenishes the tissues from within and helps make lips be fuller, redensified and hydrated.

## HOW TO USE

Apply the product on lips once or twice a day, mornings and/or evenings, and wait until the product is completely absorbed.

## ACTIVE PRINCIPLES

Active oxygen  
Jojoba oil  
Aloe Vera  
Virginia extract

Size 0.5 fl oz-15 ml

## GEL EXTRA SOOTHING ACNE

The anti-inflammatory, antimicrobial and cell regenerating properties of oxygen-ozone make this gel particularly active on the microcirculation being a multiplier of soothing, healing and antiseptic effects of salicylic acid.

Therefore, it proves beneficial when applied to active acne lesions. Its distributing action, combined with hydrolyzed placenta extracts, promotes cellular re-epithelialization and amplifies the vasoconstrictor and decongestant action of horse chestnut extracts.

## HOW TO USE

Cleanse your face and dry it by dabbing. Apply the product on the area affected by acne and wait for complete absorption. This treatment can be carried out twice a day, mornings and evenings.

## ACTIVE PRINCIPLES

Active oxygen  
Salicylic acid  
Horse chestnut extract  
Hydrolyzed placenta

ANIMALS

## GEL EXTRA CELLULITE

The anti-inflammatory, antimicrobial and cell regenerating properties of ozone make the gel particularly active on the microcirculation. Therefore, it is an adjuvant in the treatment of various inflammatory states of the tissues which can be observed in grade I, II and III cellulite. Its anti-inflammatory action and reactivation of the microcirculation is particularly useful in this skin condition, amplifying the beneficial effects of the extracts of sea oak, ivy and gotu kola widely used for this type of treatment.

## HOW TO USE

The affected area has to be thoroughly cleansed. It is advisable to apply after a hot shower, when pores are dilated and more receptive to the active substances. Apply to the affected areas such as the thighs, buttocks and knees, gently pushing skin towards the top, releasing and repeating. This movement is ideal for deeply mobilizing tissues.

## ACTIVE PRINCIPLES

Active oxygen

Sea oak extract

Ivy extract

Gotu kola extract

# GEL ULTRA HAIR-NAILS

Size 3.4 fl oz-100 ml

**Product category:**

cosmetic, gel

**Aroma:**

fragrance-free

**Color:**

## GEL ULTRA HAIR-NAILS

The very high concentration of active oxygen atoms, combined with keratin and flax seed oil, acts very deeply and makes Gel Ultra suitable for strengthening scalp and bulbs even in sparse areas of the scalp where the hair bulb is present. It helps regrowth and contributes to healthier and stronger hair. It is suitable for strengthening nails by accelerating metabolism and cellular vigor, combined with its important fungicidal and bactericidal capacity. The product is not greasy and is completely absorbed.

## HOW TO USE

**HAIR:** Apply the product to the area of the scalp to be treated and wait for complete absorption.

**NAILS:** Apply the product to nails that have been cleaned of nail polish or other applications and on the surrounding skin. Do not massage, wait for complete absorption.

## ACTIVE PRINCIPLES

Active oxygen

Keratin

Flax seed oil
